Research Funding Opportunities

2022 Cure CMD Request for Applications (RFA) International Research Grants in Congenital Muscular Dystrophy

Collagen 6, Congenital Dystroglycanopathies, LAMA2, Congenital Laminopathy, SELENON

Application Deadline: Friday, July 22, 2022, 11:59 pm Eastern Time

Thanks to the tremendous efforts of the CMD patient community, Cure CMD is pleased to announce the availability of **\$400,000** in international research grant funding for the five primary subtypes of **Congenital Muscular Dystrophy**

- Each CMD subtype constitutes a separate application for research project awards, independent of the other four CMD subtypes (funding award levels vary by subtype, see below)
- Applications that propose research in more than one CMD subtype are also welcome (funding award capped at \$100,000)
- Applicants must be affiliated with an accredited academic institution and in good standing
- Inclusion of junior investigators in your proposed project is also encouraged

Cure CMD welcomes applications for meaningful research that could translate into a treatment or care optimization, propelling our mission in support of those living with congenital muscular dystrophy.

2022 Funding Opportunities

Collagen 6	+
Congenital Dystroglycanopathies	+
LAMA2	+
Congenital Laminopathy	+
SELENON	+
