

i. **Alzheimer's Association Research Grant (AARG)**

Competition objectives: The Alzheimer's Association Research (AARG) aims to fund investigators who are less than **15 years** past their doctoral or medical degree or investigators that are new to Alzheimer's and related dementia field of research. The purpose of this program is to provide newly independent investigators with funding that will allow them to develop preliminary or pilot data, to test procedures and to develop hypotheses. The intent is to support early-career development that will lay the groundwork for future research grant applications to the National Institutes of Health, National Science Foundation and other funding agencies and groups, including future proposals to the Alzheimer's Association. All AARG applications must target defined areas of focus for fiscal year 2016 to be considered responsive to the program announcement (see Section II).

The Alzheimer's Association recognizes the need to increase the number of scientists from underrepresented groups in the research enterprise. Young scientists from these groups are encouraged to apply.

Funding and award period: Each AARG total award is limited to \$150,000 (direct and indirect costs) for up to three years, minimum of 2 years. Requests in any given year may not exceed \$60,000 (direct and indirect costs). Indirect costs are capped at 10 percent (rent for laboratory/office space is expected to be covered by indirect costs paid to the institution).

Eligibility: Applicants must be Assistant Professors or above at their respective institution. For individuals who are at non-academic institutions, please contact the Alzheimer's Association at grantsapp@alz.org to verify your eligibility. Eligibility to apply for this grant competition is restricted to investigators who have less than **15 years of research experience after receipt of their terminal degree (doctorate or medical degree)**. The 15-year period applies to the date of submission of the grant application. Adjustments for career interruptions can be made. Applicant must contact the Alzheimer's Association regarding any possible exception (grantsapp@alz.org). These would include, but are not limited to, family leave, military service, and major illness or injury. It is the responsibility of the applicant to point out and document such interruptions within their application.

Applications to the Alzheimer's Association Research Grant Program (AARG) and Alzheimer's Association Research Grant Program to Promote Diversity (AARG-D) programs will be accepted from postdoctoral fellows and other junior faculty members (for example: Instructor, Research Associate Scientist, etc.) who can provide a letter of employment verification indicating they will have a full-time faculty position of an Assistant Professor and above by the award date should the proposal be in funding range and funded.

The letter of employment must be uploaded to the application, printed on the hiring institution letterhead, signed by an authorized institutional official (i.e. Grants and Contracts officer) and must indicate that the position will be activated by the grant award date. If the anticipated position is not activated by the award date for any reason, any offer of funding will be withdrawn. There will be no exceptions. In the event your application is funded, you will be required to provide an official letter on organizational letterhead, signed by an institutional signing official, stating you have a full-time faculty position of an Assistant Professor and above.

Please note: If the applicant's institution does not have an Assistant Professor position, the letter of employment should include sufficient information to allow the Alzheimer's Association staff to evaluate the eligibility of the applicant.

Ineligibility: The Alzheimer's Association will not accept new grant applications from currently funded investigators who are delinquent in submitting required reports and other deliverables on active grants. Investigators that have previous Alzheimer's Association awards closed as 'Incomplete' are not eligible to apply without exception. **This policy will be strictly adhered to with no exceptions.**

Deadlines and award dates: Letters of Intent must be received by **5:00 PM EASTERN STANDARD TIME, April 1, 2016**. Letters of Intent will not be accepted after this date. No exceptions will be made.

Applications must be received by 5:00 PM EASTERN STANDARD TIME, May 10, 2016.

Scientific and technical review will be conducted from May through June 2016. The second-level review by the Medical and Scientific Advisory Council will be conducted during June 2016. Funding will be awarded by August 30, 2016.

Applications will be reviewed with special attention to:

- Significance of the question being studied
- Applicant information
- Quality of the work plan
- Quality and adequacy of available resources and budget
- Impact-Risk

Mechanism of Award, Reporting Requirements and Allowable Costs: The mechanism of the award is the individual research grant. The maximum allowable duration is two years. Annual scientific progress and financial reports are required. **Continuation of the grant over the awarded duration is contingent upon the timely receipt of scientific progress and financial reports.**

Budget: A "budget summary" for the proposed research project is required and must be submitted with the application and within the allowable page limits. However, if the application is to be awarded, a more detailed budget will be required and must be

approved before the disbursement of funds. **Your budget must not exceed the maximum amount of the award, \$150,000 or \$60,000 per year for a minimum of two years and up to three years.**

Allowable costs under this award:

It is required that most of the funds awarded under this program be used for direct research support.

Other allowable costs include:

- Purchase and care of laboratory animals
- Small pieces of laboratory equipment and laboratory supplies
- Computer software if used strictly for data collection
- Salary for the principal investigator, scientific (including postdoctoral fellows) and technical staff (including laboratory technicians and administrative support directly related to the funded grant)
- Support for travel to scientific and professional meetings not to exceed \$2,000 per year
- Additional support for travel expenses necessary to carry out research planned not to exceed \$1,000 per year

Direct Costs not allowed under this award include:

- Computer hardware or standard software (e.g. Microsoft Office)
- Construction or renovation costs
- Tuition
- Rent for laboratory/office space
