

A background image showing a 3D visualization of blue, rod-shaped bacteria with long, thin, hair-like appendages (flagella) extending from them, set against a dark background.

## INTERNATIONAL CALL FOR PROJECTS 2024

# ROLE OF GUT MICROBIOTA IN THE MECHANISMS OF PAIN

The project should be translational and relevant to humans.

Rules

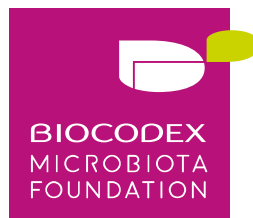

THE APPLICATION FORM CAN BE DOWNLOADED BY  
CLICKING THE ICON BELOW :

### Download application

Once you have completed the application form, the Biocodex Microbiota Foundation would be grateful if you could submit your application electronically using the following e-mail address:

[apply@biocodexmicrobiotafoundation.com](mailto:apply@biocodexmicrobiotafoundation.com)

## Application process (see application form):

All project proposals have to be written in English and in arial, 10 and must respect the stated word limits. They must include:

- Applicant's curriculum vitae: your CV should not exceed two pages including your best and most recent publications
- A confidential scientific summary of the proposal (1 page)
- A non-confidential simplified summary of the project (1/2 page): keep in mind, if your proposal is selected, this document will be published on the Foundation website
- Project description
  - 3 pages project description including the general context of your proposal, objectives, methodology, expected results, teams involved in the proposal, any necessary authorization from administrative authorities, reasons for requesting funding.
  - 1 page of bibliography
  - 1 page outlining your budget
  - 1 page outlining your time line

Applicants must notify the Foundation of any other funding received or requested for the project submitted.
