

Pioneer SCA3 Translational Research Award

Introduction

The National Ataxia Foundation (NAF) is a patient-facing nonprofit organization established in 1957 to accelerate the development of treatments for ataxias, while working to improve the lives of those living with ataxia. This continues to be at the heart of the organization today. NAF is a world leader in the ataxia research field, using national and global collaboration to further research efforts. In its continuing efforts to find the causes, treatments, and cures for the ataxias, the NAF provides limited, short-term financial support of ataxia research through its annual Research Grant Program. This document includes NAF policies and guidelines relevant to the Pioneer SCA3 Translational Research Award.

Grant Description

The Pioneer SCA3 Translational Research Award is annually granted to outstanding research proposals that aim to make significant advancements in the development of treatments and/or improvements to patient care for Spinocerebellar Ataxia Type 3 (SCA3). Proposals may incorporate other forms of ataxia but must have a predominant focus on SCA3 translational or clinical research.

Funding Period: 1 year from March 1, 2023 to February 28, 2024. No-cost extensions (NCE) will be considered for extenuating circumstances and are subject to approval by NAF.

Funding Amount: \$100,000; Indirect costs are prohibited from being applied to NAF grants.

Letter of Intent Deadline: October 5, 2022 by 12 AM CST

Application Deadline: November 2, 2022 by 12 AM CST

Eligibility & Guidelines

1. Faculty member or senior scientist at a research institution.
2. Non-U.S. citizens are eligible to apply for a NAF grant award. Grant applications are accepted from U.S. and international institutions.
3. The NAF will retain the right to unilaterally cancel any awards for non-compliance or non-performance.
4. Awards are not transferable to other researchers, but subject to NAF approval, may be transferred to a new institution should the awardee change institutions.
5. All awardees must agree to ResearchFish Statement

Grant Application Instructions

Create proposalCENTRAL Account

The NAF uses proposalCENTRAL online grant management system to facilitate the grant application and review process. All applicants must create an account prior to submitting a Letter of Intent. Use this

weblink <https://proposalcentral.com> to create an account. Instructions to submit a letter of intent and the full application can be found on the **proposalCENTRAL** website.

Letter of Intent (LOI)

Using the proposalCENTRAL online portal, submit a full title and scientific abstract of your research proposal on or before **October 5, 2022**. You will receive an email informing you whether your LOI has been accepted by **October 12, 2022**. You will be able to access the proposalCENTRAL portal to prepare and submit your application after LOI is approved.

The primary purpose of the LOI abstract is to determine if applications are in line with the outlined aims of the grant, and, if so, provide guidance to NAF for the selection of appropriate reviewers for each application. Applicants may be informed if their proposal is better suited for submission to a different NAF grant award.

Grant Application

Use proposalCENTRAL online portal to submit completed application on or before November 2, 2022 by 12 AM CST. Detailed instructions for each section can be found on the proposalCENTRAL. Dates of the proposed project will be March 1, 2023, to February 28, 2024.

Complete applications will include the following attachments:

- Lay Summary
- Scientific Abstract
- Budget Details
- Background and Significance (1 page maximum)
- Biosketch
- Literature Cited
- Preliminary Studies (1 page maximum)
- Research Plan (3 page maximum)
- Signed Signature Pages
- Specific Aims (1 page maximum)
- Institutional banking instructions for domestic or international partners

Review Dates

Applications are reviewed between late December 2022 through early January 2023. Written notification of funded and non-funded proposals will be emailed to all applicants by the end of February 2023. *Please do not call or email NAF about the status of your grant.*

Review Process

All applications are evaluated by a review committee, selected by NAF's Chief Scientific Officer. The review committee will score and prioritize all grants received by the deadline and make funding recommendations. The NAF Board of Directors will consider the recommendations and make the final approval and funding determinations.

Funding of awards is based on availability of funds, the priority score assigned to each application, the relevance to SCA3, innovation, and the translational aspect of the research project. Applications with high scores in relevance to ataxia and scientific merit will receive higher priority.

Disbursement of Funds

Awards are for one year only. Checks or electronic transfers will be issued by March 31st and sent directly to the institution of the funded researcher named in the application. Electronic payment is preferred.

Change in Status of Awarded

Awards are to remain solely with the designated awardee and may not be transferred to any other personnel. If a recipient decides to discontinue the project, the award will be terminated immediately and

all pro-rated funds shall be returned to NAF. If an investigator changes institutions, the award may be transferred, contingent upon the successor institution's commitment to support the research for the full remaining term of the award. No-cost extensions (NCE) will be considered for extenuating circumstances and require approval from NAF's research director. Please submit requests for an NCE to beth@ataxia.org.

Publications

When a paper or poster is published or presented before a scientific organization by an awardee, based on the work supported by an NAF grant, an electronic copy of the paper or a description of the presentation should be sent to the National Ataxia Foundation. All papers, posters and press releases shall carry an acknowledgement line to the National Ataxia Foundation. In addition, a copy of any press release regarding the study funded by NAF should also be e-mailed to NAF at beth@ataxia.org.

Reports

All awarded applicants are required to submit a report on key findings and deliverables resulting from the awarded project, as well as a full financial report detailing how grant award funds were utilized, using the ResearchFish online portal. Reports are due within 4 months of completion of the research project. Awardees will receive separate instructions on how to create and submit

Applicants must update their ResearchFish report once annually for up to 3 years following completion of the research project with any additional sources of funding, publications, patents, or other deliverables that can be attributed in part to the NAF award. The scientific report is reviewed by NAF staff and NAF's Medical Research Advisory Board, but is not made public.

Because the National Ataxia Foundation takes seriously its responsibility to report to its members on the use of their research contributions, the layperson final summary submitted through ResearchFish will be published in the organization's newsletter and posted on NAF's website. The summary must be written in such a manner as to be understood by the average layperson and should not contain privileged or unpublished information.

NAF Communication Outlets

The NAF reserves the right to publish the title of each funded grant, name of the principal investigator, and the name and location of the awarded through NAF communication channels, including but not limited to the NAF web page, newsletter, annual report, and social media pages.

Lay summaries will also be published in NAF communication channels and, therefore, should not contain any confidential information. The other sections of the grant application are considered confidential and will only be released to members of NAF's Medical Research Advisory Board members, the review committee, NAF staff and NAF Board of Directors.

Definitions

Indirect Costs: Indirect costs (sometimes known as Facilities and Administrative costs) are defined as costs incurred when conducting or supporting research and service, but which cannot be readily identified as benefiting research projects. Examples of indirect costs include, but are not limited to:

- Operation and maintenance: utilities, janitorial services, routine maintenance, and repairs, etc.
- Depreciation or use allowance: for buildings and equipment
- General administration and general expense: accounting, payroll, administrative offices, etc.
- Sponsored project administration: personnel and other costs of offices whose responsibility is the administration of sponsored projects
- Departmental administration expenses: administrative costs at the college and departmental levels
