# About

One Mind launched the Rising Star Awards in 2005 under the fundamental principle that cutting edge, high-risk research would allow us to find the breakthroughs to accelerate cures for the neuropsychiatric illnesses that affect 1 in 4 people worldwide. Knowing that 90% of these conditions are treatable, we wanted to create a highly impactful grant that enables the researcher to think outside of the box and pursue research that might not otherwise be federally funded. Each One Mind Rising Star Award winner receives \$300,000 over a three-year period to fund research for their studies, catalyzing innovation and encouraging collaboration and data sharing.

Since 2005, One Mind has awarded 42 awards to

- The project period for the awards is 3 years.
- The total funding for each Rising Star Research Award is \$300,000, of which \$100,000 will be distributed annually. Continuation of the awards for the second and third years of the research are dependent upon review of an annual progress report by the Chair of the One Mind Scientific Advisory Board and the One Mind Chief Scientist and Innovation Director.

## Scope

One Mind Rising Star Research Awards
